
Cystic Fibrosis: One \$117,655 grant available. Cystic fibrosis is a genetic condition affecting the lungs and digestive system. The grant will be awarded to target research to better understand exercise physiology in CF in the era of CFTR modulators, to implement and maintain exercise (fitness) programs in CF clinics, and/or to define the impact of research on health and outcomes in CF. This grant is made possible by Team Movin' for Mallory: Cure Cystic Fibrosis! and the Movin' for Mallory organization.
