
STXBP1 Encephalopathy: Two \$80,070 grants are available to advance research that supports therapeutic development for STXBP1 disorders. Projects addressing any stage of pre-clinical to clinical development will be considered, including applications exploring the fundamental science of STXBP1 disorders. Areas of interest include, but are not limited to:

1. Pathomechanisms and genotype-phenotype relationships of STXBP1 disorders.
2. Gene editing and gene replacement approaches to correct STXBP1 disorders.
3. Development of novel therapeutic approaches.
4. Development of clinical trial readiness, including non-seizure clinical endpoints.

These grants are made possible by Lulu's Crew/Team STXBP1
